sameer.goneto.space

I build things that don't exist yet. From open-source research tools to cross-platform AI apps, I take ideas from zero to shipped — sometimes in a day, sometimes in a month. Final-year B.Tech CSE student with hands-on experience shipping production SaaS products at an Antler-backed venture studio. Open to full-time roles, remote work, and interesting projects.

## EXPERIENCE

**Full Stack Developer** · Antler-backed Venture Studio 2025 – 2026 · 5 months

- Built and shipped SaaS MVPs across multiple startup ideas, each in a different domain — from B2B tooling to robotics.
- Rapid prototyping under tight timelines — delivered production-ready prototypes within days, sometimes within a week.
- Full ownership per project: React frontends, Python backends, Supabase integration, cloud infrastructure setup, and occasional brand/logo work.
- Worked under a founder with deep ties to the Antler investment network; projects were live client-facing products, not internal exercises.

## EDUCATION

**B.Tech — Computer Science & Engineering** · GGSIPU 2022 – 2026

*Final year. Graduating 2026.*

## PROJECTS

### Sieve

*Built in 3 days*

Free, open source cross-platform app that uses vision AI to automatically classify and organise image collections. No accounts, no cloud, runs on-device. 5 releases, actively maintained.

Flutter · Dart · Next.js · TypeScript · Cloudflare Pages · GitHub Actions CI/CD

### FactorSphere

*Built in ~1 month*

Open-source academic journal ranking platform with transparent methodology. 4,000+ journals, AI-powered recommendations via semantic search. Has published researcher testimonials.

Next.js · TypeScript · Tailwind CSS · shadcn/ui · Cloudflare Workers

### AiPDF Summarizer

*Built in 1 day*

Upload any PDF — text or scanned — and get an AI summary. Automatic OCR fallback for image-based PDFs. Inference runs on Cloudflare's edge with no server.

React · shadcn/ui · Cloudflare Workers AI · PDF.js · OCR.space API

### ScanWeb

*Built in 1 day*

Web vulnerability scanner. Detects XSS, SQL injection, CSRF, 10+ security headers, stack fingerprinting. Real-time scan progress, AI-assisted reports, full user auth, PWA.

Next.js 16 · TypeScript · TailwindCSS 4 · Supabase · shadcn/ui

### Dreambit

*Built in 3 weeks*

Full-stack e-commerce built from scratch without shortcuts — product catalogue, cart, orders, admin panel, invoice generation.

HTML5 · CSS3 · Vanilla JS · Node.js · Express · MySQL · Clerk

All projects: [github.com/REXFEDC](https://github.com/REXFEDC)

## SKILLS
